

.....

Qualicaps® capsules  
are engineered  
from the environment,  
carved from its  
elements, to represent  
the best of 'nature+science'  
in shaping the state  
of wellbeing

Qualicaps® is a responsible company dedicated  
to the supply of two-piece hard capsules and  
related services that takes pride in producing  
each capsule with the aim of promoting the  
basic principles of wellbeing.

to perform*

.....

## Providing effective protection of lower viscosity and aqueous fills

**Nutra'G Liquid capsules are the perfect complement to ingredients in liquid form for a rapid release of contents, and a quicker onset of their intended therapeutic effect. With a reduced time for product development and scale-up, liquid-filled hard capsules enable an earlier market entry for finished products.**

**In addition to contributing to a distinct brand identity, the patented Qualicaps® band-sealing technology offers additional protection for sensitive compounds, forming a leak-proof, perfectly airtight joined capsule that is impermeable to moisture and oxygen, and also ensures product integrity.**

### Features:

- Rapid dissolving, with constant solubility.
- 100% bovine origin like Nutra'G, these capsules are specifically designed for semi-solid and liquid fills.
- Available in size 0.
- Wide range of color and imprint options for custom capsule applications to enhance distinctive brand images and product differentiation.
- Kosher and Halal certifications available.
- Excellent performance on high-speed capsule filling machines (in-line filling and band-sealing recommended for the best guarantee against leakage).
- Maximum fill capacity recommended for optimal performance is  $\leq 75\%$  of the capsule body volume.
- Ready-available supply (shipment of stock orders within 24-48 hours in standard sizes and colors used in the nutritional industry).
- Qualicaps® Technical Service engineers are available to support in achieving productivity yields in product manufacturing.

Tamper Evident  
**PATENTED BAND SEALING  
TECHNOLOGY**

Preservative Free

Easy to Swallow

Masks Taste and Odor

Manufactured in a cGMP  
Compliant Facility

### Capsule sealing machines:

**Qualicaps® invented two-piece hard capsule band-sealing equipment.**

**Our commercially-proven technology employs a double band seal for durability, protection and visibility.**

A dosage delivery system is only as strong as its enclosure. In addition to securing contents inside the capsule, band-sealing has several end benefits:

- Helps reduce the likelihood of the product being counterfeited.
- Adds mechanical strength to the capsule.
- Enhances brand differentiation via seal colors.
- Meets the requirements for tamper evidence for OTC products.
- Prevents leakage effectively in liquid-filled capsules.
- Improves stability.
- Reduces significantly any diffusion of oxygen.
