

# Prism Capsules

**Qualicaps® Prism-G capsules offer a patented application to help improve the efficiency and efficacy of product development activities**

Features a wide range of colorants acceptable for use in pharmaceutical markets and allowing for an extensive choice of colorant options for final commercial product

Imprinted using the most prevalent pharmaceutical capsule ink formulations

Available in gelatin in sizes 00, 0EL, and 0-4

Provide the ability to use a universal capsule for product compatibility trials and method development studies

Product interaction and performance examination in capsules can start as soon as other product ingredients are available

Eliminate the initial time needed for selection of colors, approval, ordering, delivery, incoming specification setup, and incoming testing of capsules for compatibility trials

Could also eliminate the potential for repeating compatibility trials due to changes in product trade dress
